Subscription Rates 1992

Annual Institutional Subscription Rate (1992): £485.00 (US$880.00). Two-year Institutional Rate (1992/93): £921.50 (US$1672.00). Sterling prices are definitive. US dollar prices are quoted for convenience only, and are subject to exchange rate fluctuation. Prices include postage and insurance and are subject to change without notice. Subscription rates for Japan are available on request.

Progress in Neurobiology is published as 12 issues per year.

Single parts are available. Subscription enquiries from customers in North America should be sent to: Pergamon Press Inc., 660 White Plains Road, Tarrytown, NY 10591-5153, U.S.A., and for the remainder of the world to: Pergamon Press Ltd, Headington Hill Hall, Oxford OX3 0BW, U.K. Tel: (0865) 794141; Fax: (0865) 60285

At the end of the year the Subscriber will receive, free, the annual subject index.

Applications to mail at second class postage rate is pending at RAHWAY NJ. Postmaster send address corrections to *Progress in Neurobiology*, c/o Pergamon Press Inc., 660 White Plains Road, Tarrytown, NY 10591-5153, U.S.A.

CONTENTS

DEVELOPMENT OF SUBSTANCE P (SP)-CONTAINING CELLS IN THE CENTRAL NERVOUS SYSTEM: CONSEQUENCES OF NEUROTRANSMITTER CO-LOCALIZATION 1
G. M. JONAKAIT, L. NI, P. D. WALKER and R. P. HART, Department of Biological Sciences, Rutgers University, Newark, U.S.A.

ROLE OF CCK IN REGULATION OF FOOD INTAKE 23
A. J. SILVER and J. E. MORLEY, Division of Geriatrics, St. Louis University School of Medicine, St. Louis, MO 63104, U.S.A.

GABA RECEPTOR MECHANISMS IN THE CENTRAL NERVOUS SYSTEM 35
L. SIVILOTTI and A. NISTRI, Department of Pharmacology, St. Bartholomew's Hospital Medical College, Charterhouse Square, London EC1M 6BQ, U.K.

THE REGULATION OF QUANTAL SIZE 93
W. VAN DER KLOOT, Departments of Physiology and Biophysics and of Pharmacological Sciences, Health Science Center, Stony Brook, NY 11794, U.S.A.

NEUROPHYSIOLOGY AND NEUROPHARMACOLOGY OF HYPOTHALAMIC MAGNOCELLULAR NEURONS SECRETING VASOPRESSIN AND OXYTOCIN 131
L. P. RENAUD* and C. W. BOURQUE†, *Neurology Division, Neurosciences Unit, Ottawa Civic Hospital, 1053 Carling Avenue, Ottawa, Ontario, Canada. †McGill Center for Research in Neuroscience, Montreal General Hospital, Montreal, Quebec, Canada

MECHANISMS THAT MAY UNDERLIE THE BEHAVIOURAL EFFECTS OF ETHANOL 171
H. J. LITTLE, Pharmacology Department, The Medical School, University Walk, Bristol BS8 1TD, U.K.

MONOAMINE SYSTEMS IN THE CEREBRAL CORTEX: EVIDENCE FOR ANATOMICAL SPECIFICITY 195
G. C. PAPADOPOULOS* and J. G. PARNAVELAS†, *Laboratory of Anatomy, Veterinary School, University of Thessaloniki, Greece. †Department of Anatomy and Development Biology, University College, London, U.K.

CLASSICAL (PAVLOVIAN) CONDITIONING MODELS OF AGE-RELATED CHANGES IN ASSOCIATIVE LEARNING AND THEIR NEUROBIOLOGICAL SUBSTRATES 201
D. A. POWELL*†, S. L. BUCHANAN* and L. L. HERNANDEZ†, *Neuroscience Laboratory, Wm Jennings Bryan Dorn VA Medical Center, Columbia, SC 29201, U.S.A. Department of Psychology, University of South Carolina, Columbia, U.S.A. †Department of Neuropsychiatry and Behavioral Science, University of South Carolina School of Medicine, Columbia, SC 29208, U.S.A.

ON THE INTERPRETATION OF ASYMMETRIES OF POSTURE AND LOCOMOTION PRODUCED WITH DOPAMINE AGONISTS IN ANIMALS WITH UNILATERAL DEPLETION OF STRIATAL DOPAMINE 229
R. MILLER* and R. J. BENINGER† , *Department of Anatomy and Neuroscience Centre, University of Otago Medical School, PO Box 913, New Zealand. †Department of Psychology, Queens University, Kingston, Ontario, Canada

TACRINE: A PHARMACOLOGICAL REVIEW 257
S. E. FREEMAN and R. M. DAWSON, Materials Research Laboratory (MRL)—DSTO, PO Box 50, Melbourne, Australia

FRACTAL AND CHAOTIC DYNAMICS IN NERVOUS SYSTEMS 279
C. C. KING, Department of Mathematics and Statistics, University of Auckland, Auckland, New Zealand

THE MODULAR CEREBELLUM 309
R. HAWKES* and C. GRAVEL†, *Department of Anatomy and Neuroscience Research Group, Faculty of Medicine, University of Calgary, Alberta, Canada. †Institut de Recherche Clinique, Montreal, Canada

THE ELECTROPHYSIOLOGY OF ADENOSINE IN THE MAMMALIAN CENTRAL NERVOUS SYSTEM 329
R. W. GREENE* and H. L. HAAS†, *Harvard Medical School and Brockton Veterans Administration, MA 02401, U.S.A. †Johannes Gutenburg-Universität, Mainz, F.R.G.

INSULIN RECEPTORS IN THE CENTRAL NERVOUS SYSTEM: LOCALIZATION, SIGNALLING MECHANISMS AND FUNCTIONAL ASPECTS 343
J. W. UNGER*, J. N. LIVINGSTON† and A. M. MOSS‡, *Department of Anatomy, University of Munich, Pettenkoferstrasse 11, D-8000 München 2, F.R.G. †Department of Medicine, Endocrinology Unit, and ‡Department of Neurology, University of Rochester, 601 Elmwood Avenue, Rochester, NY 14642, U.S.A.

THE PEDUNCULOPONTINE NUCLEUS 363
E. GARCIA-RILL, University of Arkansas for Medical Sciences, 4301 W. Markham, Little Rock, AR 72205-7199, U.S.A.

CENTRAL SYNAPTIC TRANSMISSION: STUDIES AT THE CONNECTION BETWEEN PRIMARY AFFERENT FIBRES AND DORSAL SPINOCEREBELLAR TRACT (DSCT) NEURONES IN CLARKE'S COLUMN OF THE SPINAL CORD 391
B. WALMSLEY, Neural Research Laboratory, School of Anatomy, University of New South Wales, PO Box 1, Kensington, Australia

THE NEUROLEPTIC MALIGNANT SYNDROME 425
W. DICKEY, Belfast City Hospital, Lisburn Road, Belfast BT9 7AB, U.K.

QUANTITATIVE STUDIES ON THE MAMMALIAN CEREBELLUM 437
R. J. HARVEY and R. M. A. NAPPER, Department of Anatomy and Neuroscience Centre, University of Otago Medical School, PO Box 913, Dunedin, New Zealand

MODULATION OF OXYTOCIN AND VASOPRESSIN RELEASE AT THE LEVEL OF THE NEUROHYPOPHYSIS 465
N. FALKE, Sektion Elektronenmikroskopie, Universität Ulm, Postfach 4066, D-7900 Ulm, F.R.G.

ASPECTS OF VERTEBRATE NEURONAL VOLTAGE-ACTIVATED CALCIUM CURRENTS AND THEIR REGULATION 485
R. H. SCOTT*, H. A. PEARSON† and A. C. DOLPHIN†, *Department of Physiology, St. George's Hospital Medical School, Cranmer Terrace, Tooting, London SW17 0RE, U.K. †Department of Pharmacology, Royal Free Hospital of Medicine, Rowland Hill Street, London NW3 2PF, U.K.

INDEX

Acetylcholine
  age-related decline in nucleus basalis 219
  effect on magnocellular neurosecretory neurons 137
  packaging into vesicles 103, 108
  quanta 94
  role in neural lobe 479
  tacrine effects on release of 268
Acetylcholinesterase
  in cerebellum 314
  development 321
  inhibition by tacrine 259
Action potentials, neurosecretory cells 134
Adaptive resonance theory 292
Adenosine
  electrophysiology 337
  epilepsy and hypoxia 338
  inhibition of evoked synaptic potentials 334
  mediators of electrophysiological effects 335
  postsynaptic effects 330
Adenosine-3′,5′-monophosphate
  interaction with Ca^{2+} channels 509
  role in electrophysiological effects of adenosine 336
Adenosine receptor subtypes, electrophysiology 335
Ca^{2+}-Adenosine triphosphatase, effect of ethanol on calcium flux 181
Adrenaline, quantal size 113
Adrenergic receptors, in neurohypophysis 478
Afterhyperpolarization
  hippocampus 220
  hypothalamic magnocellular neurons 134
Age, food intake 25
Aging, changes in associative learning 201–228
  classical conditioning operations 202
  humans 213, 222
  neurobiological substrates 215
  non-human animals 207, 222
Agranular prefrontal cortex, age-related changes in associative learning 217
Alpha responding 215
Alphaxalone, effect on GABA channels 52
Alzheimer's disease, tacrine 259, 269, 271
Amantidine, treatment of neuroleptic malignant syndrome 430
γ-Aminobutyric acid
  effect on Ca^{2+} channels 504
  effect on magnocellular neurosecretory neurons 144
  effect on neurohypophysial hormone release 479
  effect of tacrine on release of 269
γ-Aminobutyric acid/benzodiazepine receptor complex, effect of ethanol 173
γ-Aminobutyric acid receptor, central visual pathway 57
γ-Aminobutyric acid A receptors
  binding sites 37
  biochemical pharmacology 36
  Cl^- channels 47, 49
  Cl^- flux measurements 41
  conductance of gated ion channel 44
  ionic selectivity 43
γ-Aminobutyric acid B receptors 53
γ-Aminobutyric acid transmission
  autoregulation 55
  brainstem nuclei 77
  cerebellum 75
  ethanol effects 174
  hippocampus 58
  nucleus accumbens 75
  olfactory bulb 68
  olfactory cortex and neocortex 64
  septal nuclei 70
  spinal cord 77
  striatum 73
  substantia nigra 74
  thalamus 71
Aminooxyacetic acid, effect on ethanol action 175
Aminoquinolines, gMEPPs 107
Amphetamine
  induced rotation 236
  stereotypy 249
Amygdala central nucleus, age-related changes in associative learning 217
Analgesia, pedunculopontine nucleus 371
Angiotensin, effect on neurosecretory neurons 149, 476
Antibodies, effect on neuronal Ca^{2+} channel function 501
Apomorphine, effect on rotatory behaviour 235
Arachidonic acid, interaction with Ca^{2+} channels 210
Argiotoxin 636 500
Arousal, pedunculopontine nucleus 370, 374
Associative learning, age-related changes 201–228
Asymmetries, dopamine, posture and locomotion 229–256
Atriopeptins, effect on magnocellular neurosecretory neurons 150
Atrotoxin, interaction with Ca^{2+} channels 501
Attention, pedunculopontine nucleus 374
Autism 375
Autonomic responses
  age-related changes in associative learning 210
  role of insulin 355

Baclofen, $GABA_B$ receptors 53
Barbiturates
  effect on GABA receptors 39, 43, 51
  interaction with Ca^{2+} channels 503
Bay 8644, interaction with Ca^{2+} channels 184, 186, 499
Behaviour
  dopamine and asymmetries of posture and locomotion 229–256
  effects of ethanol, mechanisms 171–194
Benzodiazepines, binding to GABA receptor complex 39, 43, 52
Benzodiazepine/GABA receptor complex, effect of ethanol 173
Benzodiazepine receptor inverse agonists, effect on effect of ethanol 176

Bicuculline 39, 50
Biogenic amines, effect on magnocellular neurosecretory neurons 137
Blood–brain barrier, insulin 344
Bombesin, effect on food intake 27
Botulinium toxins, gMEPPs 106
Brainstem, insulin receptors 346
Brainstem nuclei, GABAergic transmission 77
Bromocriptine, treatment of neuroleptic malignant syndrome 429
Bulimia nervosa 29
t-Butylbicyclophosphorothionate, binding in brain 41
Butyrylcholinesterase, inhibition by tacrine 259

Caffeine, effect on adenosine evoked excitation 337
Calcineurin 496
Calcium
  dependent potassium current, effect of adenosine 332
  effect of ethanol on movement of 180
  flux in hippocampus, age and conditioning defects 220
  homeostasis in neurons 486
Calcium channels 180
  effect of ethanol 183
  effect of tacrine 265
Calcium channel ligands 497
Calcium currents 485–520
  baclofen-induced depression 54
  classification 493
  effect of adenosine 332
  electrophysiological methods 488
  functional aspects 511
  inactivation and rundown 495
  pharmacology 496
  regulation by neurotransmitters and neuromodulators 503
  second messenger systems link receptors 506
Catatonia 431
Catecholamines
  in neuroleptic malignant syndrome 426
  effect on oxytocin and vasopressin release 478
Caudate nucleus, age-related changes in associative learning 216
Cerebellum 309–327, 437–463
  age-related changes 217
  compartmentation/connectivity 315, 322
  corticonuclear projection 317
  development 318
  electron microscopy 443
  GABAergic transmission 75
  granule cell density 443, 453, 457
  insulin receptors 346
  levels of organization 318
  light microscopy 440
  molecular markers of compartmentation 310
  parallel fibres 455, 457
  pf-P synapses 255
  Purkinje cell number and density 440, 453, 456
  stereological methods 447
  synapse area per Purkinje cell 456
  synaptic components in molecular layer 454
  volumes 450, 456
Cerebrospinal fluid, insulin in 344

Chaotic and fractal dynamics 279–308
  concepts and techniques 280
  diversity of non-linear characteristics 294
  encephalogram 301
  excitable cells 297
  fractal extension to quantum level 304
  modelling of neural systems 290, 299
  olfactory bulb 299
Chay–Rinzel model of the chaotic neuron 297
Chirikov map 288
Chlordiazepoxide, ethanol interaction 178
Chloride, GABA-induced flux, effect of ethanol 175, 176
Chloride channel, $GABA_A$ receptor 43, 47, 49, 57
Chloride flux, $GABA_A$ receptor activity 41
Chlorpromazine, neuroleptic malignant syndrome 426
Cholecystokinin
  effect on neurosecretory neurons 146, 476
  role in regulation of food intake 23–34
Choline acetyltransferase, in SON neurons 137
Cholinesterase
  Alzheimer's disease 271
  inhibition by tacrine 259
Cholinoceptive pontine inhibitory area 376
Circumventricular organs, insulin receptors 344, 353
CL 218872, binding in brain 40
Clarke's column 391
  afferent input to DSCT neurons 392
  morphology of DSCT neurons 392
  morphology of primary afferent boutons 397
  ultrastructural studies of collaterals 395
  ultrastructure of synaptic boutons 397
Classical conditioning
  age-related changes in humans 213, 222
  age-related changes in non-human animals 207
  controls for non-associative influences on performance 214
  experimental operations 202
  hippocampus 219
  neurobiological substrates for age-related deficits 215
Climbing fibres, compartments, cerebellum 315, 323
Coma, pedunculopontine nucleus 376
Compartmentation and connectivity in cerebellum 315, 322
ω-Conotoxin, effect on Ca^{2+} channels 494, 500
Contralateral sensory attractiveness, dopamine 243
Contralateral syndrome 232
Corticonuclear projection 317
Corticosteroids, quantal size 120
Corticotropin releasing factor 376
  effect on oxytocin and vasopressin release 477
Cysteine sulfinic acid decarboxylase, in cerebellum 313, 315
Cytochrome oxidase, in cerebellum 314

D600, interaction with Ca^{2+} channels 498
Dantrolene, treatment of neuroleptic malignant syndrome 429
Deconvolution, EPSP amplitude fluctuations 412
Dendritic tree 295
Denervation supersensitivity to dopamine 241
Depolarizing afterpotentials 135

Depression, pedunculopontine nucleus 376
Development
  brain insulin receptors 355
  cerebellum 318
  substance P-containing neurons 1–21
Diabetes mellitus, brain insulin receptors 356
Diazepam, binding site in brain 39, 40
Dihydropicrotoxinin, binding in brain 41
Dihydropyridines
  binding in brain, effect of ethanol 184
  interaction with Ca^{2+} channels 497
Dopamine
  abnormalities in neuroleptic malignant syndrome 426
  behavioural actions in striatum 231, 242
  denervation supersensitivity 241
  effect of tacrine on release of 269
  effect on neurosecretory neurons 139, 478
  involvement in learning and memory, age-related changes 216, 218
  regional differences in striatal function 232
Dopamine agonists
  stereotypy 249
  turning behaviours 235
Dopamine antagonists, effect on apomorphine-induced rotation 239
Dopamine receptors, rotatory behaviour 237, 244
Dorsal spinocerebellar tract neurones
  afferent input to 392
  morphology 392
  physiology 405
  quantal transmission at group 1 afferent connection 412
Dynorphin(1–8), effect on oxytocin release from neurosecretosomes 473
Dynorphin-related peptides, in neurohypophysis 466

Edge-walking 243
Eicosanoids, effect on oxytocin and vasopressin release 477
Electroconvulsive therapy, neuroleptic malignant syndrome 430
Electroencephalogram, experimental chaos in 301
Embryo, substance P-containing neurons 2
Enkephalins
  effect on oxytocin release from neurosecretosomes 473
  in magnocellular neurons 151
  in neurohypophysis 469
Ependyma, insulin receptors 353
Epidermal growth factor, in brain 354
Epilepsy
  pedunculopontine nucleus 375
  role of adenosine 338
Ethanol, behavioural effects 171–194
  cell calcium 180
  excitatory amino acid transmission 187
  GABA/benzodiazepine receptor complex 173
  tolerance and dependence 176, 179, 183, 186
  withdrawal 178, 185, 188
Excitable cells, chaos and fractal dynamics 297
Excitatory amino acids, effect on magnocellular neurosecretory neurons 142
Excitatory amino acid transmission, effect of ethanol 187
Eyeblink conditioned response 203, 207, 213, 223

Familial infantile myasthenia 121
Feeding behaviour
  brain insulin receptors 355
  role of cholecystokinin 23–34
Fetus, substance P-containing neurons 2
FG7142, effect on behavioural actions of ethanol 176
Fluspiriline, effect on Ca^{2+} channels 503
Fractal dynamics 283
  excitable cells 297
  in a voltage-dependent K^+ channel 298
  quantum level 304
Freeman–Skarda model of the olfactory bulb 299
Funnel web spider toxin, interaction with Ca^{2+} channels 500

Galanin
  in magnocellular neurosecretory neurons 150
  effect on neurohypophysial hormone release 476
Gastric emptying, role of cholecystokinin 26, 29
Gastrins, effect on oxytocin and vasopressin release 476
Gastrointestinal peptides, food intake 23
Giant miniatures 104
Globus pallidus, GABAergic transmission 73
Glucagon, effect on food intake 27
Glucocorticoids, aging and learning 221
Glucose, role of cholecystokinin in homeostasis 25
Glutamate
  binding in brain, effect of ethanol 187
  effect on magnocellular neurosecretory neurons 143
Glutamate decarboxylase, in cerebellum 314
Glutamate receptors, dorsal spinocerebellar tract neurons 407
Glycine, effect on magnocellular neurosecretory neurons 144
Glycolate psychotomimetic drugs, interaction with tacrine 258
G-protein
  $GABA_B$ receptors 54
  interaction with Ca^{2+} channels 499, 506
  role in electrophysiological effects of adenosine 336
Granule cells
  density 443, 453, 457
  GABAergic transmission 63
  particle counting 447
Guanosine-3′,5′-monophosphate, interaction with Ca^{2+} channels 509

Haloperidol
  effect on apomorphine-induced rotation 239
  neuroleptic malignant syndrome 426
Hausdorff dimension 282
Heart rate, conditioned response 203, 206, 210, 223
Heatstroke, neuroleptic-induced 431
Hemicholinium-3, effect on MEPP 109
Heparin, interaction with Ca^{2+} channels 503
Hippocampus
  age-related changes in associative learning 219
  GABAergic transmission 58
Histamine, effect on magnocellular neurosecretory neurons 138
Hopf bifurcation 286, 287

Hopfield nets 290, 292
Horseshoes 287, 288
6-Hydroxydopamine, effect on motor control 231, 233
5-Hydroxytryptamine
  containing cells in medullary raphe, co-location with substance P 12
  innervation in cerebral cortex 196
  effect on magnocellular neurosecretory neurons 142
  effect of tacrine on release of 269
Hyperpolarizing afterpotential 134
Hypothalamus, magnocellular neurons 131–169
Hypoxia, role of adenosine 339

Inhibin-related peptides, in magnocellular neurons 152
Inhibitory amino acids, effect on magnocellular neurosecretory neurons 144
Inositol phospholipid, interaction with Ca^{2+} channels 510
Insulin
  action in brain 354
  effect on MEPP size 114
  origin in CNS 344
Insulin-like growth factor-1 receptor, in brain 345, 354
Insulin receptors in brain 343–362
  biochemistry 345
  disease state 355
  function 354
  identification 344
  localization 345
  signalling mechanisms 353
Interleukin-1β, effect on oxytocin and vasopressin release 477
Interneurones, GABAergic transmission 64, 68
Ion channels, tacrine interactions 265
Ipsilateral motor control 233, 244

Julia sets 283, 287

Kolmogorov entropy 282

L-364,718, effect on food intake 30
Lambert–Eaton myasthenic syndrome 501
Laterodorsal tegmental nucleus 364
Learning, aging 201, 207
Leptinotarsin 501
Liapunov exponent 281, 284
Lithium, role in neuroleptic malignant syndrome 427
Locomotion
  dopamine agonists and asymmetries 229–256
  pedunculopontine nucleus 366
LY 171555, induced rotation 237, 238

Magnocellular neurosecretory neurons
  amino acids 142
  biogenic amines 137
  identification 132
  intrinsic properties 133
  peptides 146
  synaptic inputs 135
Malignant hyperthermia 426, 430
Mandelbrot set 285
McCulloch–Pits neurons, mathematical modelling 291
Medullary raphe, 5-HT and substance P cells in 12
Melanocyte-stimulating hormone, effect on oxytocin and vasopressin release 477
Memory
  adaptive resonance theory 293
  aging 201, 207
Menthol, effect on Ca^{2+} channels 503
Mesencephalic locomotor region 367
N-Methyl-D-aspartate receptors
  effect of ethanol 187, 188
  effect of tacrine 267
Methylxanthines, effect on adenosine evoked excitation 337
Metoclopramide, neuroleptic malignant syndrome 427
Miniature end-plate current 94
  channel opening times 100
  sites of generation 101
Miniature end-plate potential, quantal size 95, 104, 113
MK 801 187, 188
Monoaminergic cortical systems, anatomical specificity 195–200
Monstrosities, quantal size 104, 123
Morphine
  effect on magnocellular neurosecretory neurons 151
  tacrine interaction 257
Mossy fibres, cerebellum, compartments 316, 323
Motilin, in cerebellum 313
Muscarinic receptors, tacrine interaction 263
Muscimol 38, 49
  effect on magnocellular neurosecretory neurons 144

Narcolepsy 373
Neocortex, GABAergic transmission 64
Nerve agent poisoning, tacrine as an antidote 262
Neural nets, mathematical models 291
Neurohypophysis, modulation of oxytocin and vasopressin release 465–484
Neuroleptic malignent syndrome
  causative drugs 426
  clinical features 428
  differential diagnosis 430
  incidence 428
  pathogenesis 425
  patients at risk 427
  rechallenge with neuroleptic agents 431
  treatment 429
Neuromuscular junction, quantal size 94
Neurons
  calcium channels 493
  calcium homeostasis 486
  diversity of non-linear characteristics 294
  insulin receptors 346
Neuropeptide Y, effect on magnocellular neurosecretory neurons 147
Neurosecretory neurons 131–169
Neurosecretosomes
  opioid binding sites 470

oxytocin and vasopressin release 470
Neurotransmitters
regulation of Ca^{2+} channels 503
release, multiple feedback links 296
effect of tacrine on release and uptake of 268
Nictitating membrane, conditioned response 203, 207, 215, 223
Nimodipine, aging and learning 221
Nitrendipine, interaction with Ca^{2+} channels 499
Noradrenaline
age-related learning deficits 218
Alzheimer's disease 271
effect of tacrine on release of 270
effect on Ca^{2+} channels 505
effect on magnocellular neurosecretory neurons 140
innervation in cerebral cortex 196
quantal size 113
Noradrenaline receptors, in neurohypophysis 478
5′-Nucleotidase, in cerebellum 313
Nucleus accumbens
dopamine and locomotor activity 233
GABAergic transmission 75
Nucleus basalis, effect of aging 219

Obesity, brain insulin receptors 356
l-Octanol, effect on Ca^{2+} channels 503
Olfactory bulb
Freeman–Skarda model 299
GABAergic transmission 68
Olfactory cortex, GABAergic transmission 64
Opiates, cholecystokinin interaction 25
Opioid peptides, effect on magnocellular neurosecretory neurons 151
Opioid peptides in neurohypophysis
binding sites 469
effect on oxytocin and vasopressin release 470
localization 466
role 474
κ-Opioid receptors, in neurohypophysis 469
Optic tectum, GABA receptor in 57
Organophosphorus compounds, tacrine as an antidote 262
Oxytocin, modulation of release 465
angiotensin 476
catecholamines 478
cholecystokinins 476
corticotropin releasing factor 477
eicosanoids 477
GABA 479
galanin 476
gastrins 476
interleukin-1β 477
melanocyte-stimulating hormone 477
opioids 470
oxytocin 149, 475
relaxin 477
vasoactive intestinal peptide 475
Oxytocin receptors 474
Oxytocin secretory neurons 132
amino acids 142
biogenic amines 137
intrinsic properties 134
peptides 146
synaptic inputs 135

Pain, pedunculopontine nucleus 371
Pancreatitis, cholecystokinin 25
Parallel fibre to Purkinje cell synapses 449, 455, 458
Paraventricular nuclei, neurosecretory neurons 132
Parkinson's disease, striatum and motor control 233
Pedunculopontine nucleus 363–389
anatomy and physiology 364
development 368
locomotion 366
model 378
pathophysiology 373
rhythmic functions 369
Penicillin, effect on GABA-induced currents 50
Peptides, effect on magnocellular neurosecretory neurons 146
Pergolide, induced rotation 237, 240
Phencyclidine receptor, effect of tacrine 267
Phenothiazines, neuroleptic malignant syndrome 426
Phenytoin, effect on Ca^{2+} channels 503
Phospholipase A2, interaction with Ca^{2+} channels 510
Phospholipase C, interaction with Ca^{2+} channels 510
Phosphotyrosine, in brain, insulin receptor 353
Physostigmine, treatment of Alzheimer's disease 271
Picrotoxin, binding in brain 41, 50
Pirenzepine, binding in brain, effect of tacrine 263
Pitrazepin 39
Pituicytes 466
opioid binding sites 470
PN 200–110 185, 186
Polyamine toxins, interaction with Ca^{2+} channels 500
Posture, dopamine agonists and asymmetries 229–256
Potassium, effect on quantal size 116
Potassium channel
effect of tacrine 265
fractal dynamics in 298
Potassium conductance
adenosine effects 330, 332
baclofen-induced activation 54
Power spectrum 282
Preprotackykinin 11, 17
Probabilistic quantal models 414
Prodynorphin-derived peptides, in neurohypophysis 466
Proenkephalin-derived peptides, in neurohypophysis 469
Proglumide, effect on food intake 30
Prostaglandins, effect on oxytocin and vasopressin release 477
Protein kinase A, quantal size 113
Protein kinase C
interaction with Ca^{2+} channels 509
role in electrophysiological effects of adenosine 336
Proton gradient, cholinergic vesicles 104, 115
Pseudoconditioning 215
Purkinje cells 438
aging 217
density 440, 453, 456
electron microscopy 440

maturation 318
pf-P synapses 449, 455

total area of layer 447
zebrin I in 310, 314
Pyramidal cell, structure 295

Quantal size 93–130
ACh packaging into vesicles 103
data display and plotting 96
frog 113
measurement 95
modelling miniatures 101
monstrosities 104
rodents 119
shifting population 113
sites of MEPC generation 101
statistical tests 98
Quantal transmission 420
group 1 afferent – DSCT neurone connection 412
Quantal variance 414
Quasiperiodicity, chaos 287, 288
Quinuclidinylbenzilate, binding in brain, effect of tacrine 263

Relaxin, effect on oxytocin and vasopressin release 477
REM sleep, pedunculopontine nucleus 369, 373
Respiration, sleep-related disorders 374
Rhythmic functions, pedunculopontine nucleus 369
Ro 5-4864 40
Ro 15-1788 176
Ro 15-4513, effect on behavioural action of ethanol 176, 178
Rotatory behaviour, effect of dopamine agonists 235

Satiety system 23, 25
SCH 23390, effect on rotation 239, 240
Schizophrenia, pedunculopontine nucleus 376
Secretosomes 466
opioid binding sites 470
oxytocin and vasopressin release 470
Sensory modulation, pedunculopontine nucleus 370
Sensory neglect/hyperattention syndrome 245
Septal nuclei, GABAergic transmission 70
Serotonin syndrome 431
Sex differences, age-related changes in associative learning 207, 209
Skeletal muscle, neuroleptic malignant syndrome 426
SKF 38393, induced rotation 237
Sleep-wake mechanisms, pedunculopontine nucleus 369, 373
Small cell lung carcinoma, Ca^{2+} conductance 502
Sodium, effect on quantal size 115
Somatomotor responses, age-related changes in associative learning 207
Somatomotor substrates, age-related changes 215
Somatostatin
effect on food intake 27
effect on magnocellular neurosecretory neurons 147
Spinal cord
GABAergic transmission 77
substance P in during development 12
synaptic transmission 391–423
Spin glasses 290
Stereotypy, dopamine agonists 249
Steroids, effect on GABA channels 52
Striatum
dopamine and asymmetries of posture and locomotion 229–256
GABAergic transmission 73
Subminiatures 112
Substance P, in magnocellular neurosecretory neurons 150
Substance P containing cells 1–21
embryonic development 2
serotonergic neuron co-localization 12
Substantia nigra, GABAergic transmission 74
Succinylcholine, interaction with tacrine 258
Sudden infant death syndrome 374
Sulpiride, effect on apomorphine-induced rotation 239
Supraoptic nuclei, neurosecretory neurons 132
Synapse, diversity of non-linear characteristics 296
Synaptic boutons, Clarke's column 397
Synaptic transmission, spinal cord 391–423
Clarke's column 391
